

BEAUTY, STRENGTH, QUALITY

RHINO.IE

Why Choose A Rhino Door

At Rhino doors we are purely focused on manufacturing the very best composite door in Ireland that is **Custom Made** to your specifications.

When you choose to buy a Rhino Door, you can be sure that you are investing your money in a Beautiful, Strong, High Quality, Energy Efficient, Low Maintenance Door that will reliably serve this generation and the next. As a local Irish manufacturer, you can also be sure that you are supporting Irish jobs.

Beauty & Visual Appeal

We only make doors with the finest **grain definition**. Developed from the grain of real Oak tree's, our doors stand out for their authentic and well-defined wood grain.

With over 50 standard **door styles** in our range, and a choice of **2,800 colours**, we offer something for everyone. From solid doors to glazed doors, traditional to contemporary, understated and elegant to something that really stands out from the crowd, we've got the **perfect door for your home**.

Our door handles and letterboxes retain a **timeless look that won't date**, whilst our hinges are the most **discrete** available yet remain reliably strong.

The **inverted panelling** on our panelled doors lends a classy look to a Rhino Door unlike any other. With no protruding panels they remain sleek and strong, whilst also being extremely easy to keep clean. Our **T&G / Cottage** style doors (i.e. Bloom or similar) are a firm favourite, thanks mainly to the generous spacing of the grooves across the full width and full height of the door, this gives our T&G doors a much less fussy and **more traditional** appearance.

Strength & Security

As a **solid core engineered composite door** panel, you can rest assured that we offer the strongest door to protect your home. All our door panels exceed PAS 24, the door industry's enhanced security standard.

With a **high-density** CFC free polyurethane core, a **rigid** polymer frame, and a **high impact resistant** GRP skin, our door panel is the heaviest and most robust composite door you can buy. We use a heavy walled 5 chamber pvc frame, which is **fully reinforced** with heavy gauge steel.

Our **10-point lock** offers ultimate security and weathering. All our doors come with 1-star security as standard, meaning that they are **Anti Bump, Anti Pick, and Anti Drill**. We have an optional upgrade to 3-star security which will make it **Anti Snap**.

Quality & Durability

Each hand finished door has undergone rigorous **quality control** inspections at every stage of production to ensure that the door you receive is finished to an excellent standard.

Our tough and durable paint has been tested to **exceed the European Qualicoat Standards**, the highest quality standard for paint in Europe. When selecting the best paint to use we chose a car paint, as we wanted to ensure that we had a proven hard-wearing product, that would stand the test of time. As well as it's excellent hardness properties, our paint also offers excellent colour fastness, and is anti-stain. It is very easy to maintain and keep clean.

We only use **stainless steel** products for our Chrome and Gold handles, letterboxes, and traditional knockers. This offers excellent **anti-corrosion and strength**. It is a significant step up from the standard plated zinc used by other manufacturers.

Expertise

The **expert team** behind Rhino Doors take great pride in manufacturing your custom door. With over 12 years' experience manufacturing composite doors, we really know what we are doing when it comes to making doors. We are extremely proud of our knowledgeable, skilled and loyal staff, and our exceptionally low staff turnover.

Developing a great door is only half the work but having a **great team** behind it ensures we can consistently exceed expectations and take great pride in every door we manufacture.

Energy Efficiency & Weatherproofing

The solid core at the centre of our door is a **100% CFC free high-density polyurethane** which is the same material that is used to insulate the walls of your home. It makes sense to use the same material to insulate your door.

Our excellent energy efficiency can easily be demonstrated with our u-values as follows:

- Solid door in frame: **0.6 w/m2.k**
- Glazed door in frame: **0.7 w/ m2.k**

The Rhino Door u-values are **29% more energy efficient** than other composite doors.

Our heavy and solid doors are an excellent sound barrier, and with a weighted **sound reduction of 31 decibels**, you can be sure your Rhino Door will keep the outside noise to a minimum.

Other features including the evenly spaced **compression points** along our door lock, the **continuous seal** around the corners of our door slab, the **high rigidity** of both our door slab and frame, as well as the **high quality** sealing gaskets we use, all ensure that you have an extremely well-sealed door, ready to withstand the worst weather conditions.

Attention to Detail

And finally, the little details that make the Rhino Door the **best composite door** in Ireland today:

- **Door edge finishing:** fully finished and painted door edges are standard on all Rhino Doors.
- **45 degree chamfered corners** take the sharp edge off our door edges.
- By **hand painting** our doors we are able to retain a beautiful surface finish.
- Our standard **45mm door handle backset** looks great, but also ensures heavy keyrings are much less likely to get caught and damage your door or frame.
- Our discrete **slim hinges** look great and perform better than other hinge types.
- All of our **decorative door glass** is sealed into the centre of a 50mm triple glazed unit to ensure that they stay clean and are easily maintained.

We are confident that you will be extremely happy with your purchase of a Rhino Door.

John Dempsey - Managing Director

HOW TO CHOOSE YOUR RHINO DOOR

Time to pick your perfect colour

There are countless different colours in nature, so why limit your door colour choice? At Rhino Doors we offer you a choice of 2,800 different colours. Simply select a RAL colour or British Standard colour code and we will do the rest.

We are all individuals, and each of our homes are unique. At Rhino Doors we believe your door is a key individual statement for the front of your home, so we let you colour it whatever way you want. You may choose to have the same colour inside and outside, or you may choose different colours. White is a very popular colour for the inside of a door, as white on the inside will usually make the inside of your home feel more spacious. Cream is also a very popular colour for the inside of any door. The choice as always is yours.

Finally, why not spread the colour choice to your door frame also? At Rhino Doors we want you to have your door exactly the way you've always dreamed it would be. You can have your frame match the colour of your door leaf, or maybe you want something to contrast the colour. At Rhino Doors we let you decide.

Some of our more popular colours are represented on page 37, however, do bear in mind that we can produce any RAL colour or British Standard colour that you desire.

Select your favourite door style

With over 50 door styles to choose from, there is something to suit every taste. For a single page summary of our door styles please see page 46. You may also wish to browse through pages 5 – 36 for a more thorough presentation of our door styles.

From solid doors to glazed doors, traditional to contemporary, understated and elegant to something that really stands out from the crowd, we've got the **perfect door for your home**.

We've got the ideal glass for your Rhino Door

When it comes to selecting the perfect glass for your door, we are always flexible. Almost all glass ranges are available in all door styles, and we have a very wide selection of backing glass. For a full display of glass, please see our main pages from 5 – 36. Please also have look at pages 39 & 40 where we walk you through the full options when it comes to personalising your door glass, including changing the colour of your glass. Remember at Rhino Doors, we always triple glaze our glass for performance and ease of maintenance.

Handles, hinges and hardware

Our stylish range of sleek door furniture ensures you will have an exceptional choice of functional decorations to finish off your door. For our full range please see pages 41 & 42. With a wide range of colour choices, and multiple options on handle type, you are sure to find to perfect finish for your door.

How to order your Rhino Door

Your local door installer is the best person to advise you on the finer details of your Rhino Door purchase. Once you have decided which style of door you want to purchase, simply contact your local door expert and they will take care of the rest. If you are not familiar with any door installers in your local area please contact us via www.rhino.ie and we will be happy to put you in touch with someone in your area.

Expert Team	<p>Knowledgeable and experienced staff.</p> <p>Owner led business.</p> <p>Extremely low staff turnover rate.</p> <p>Highly skilled team.</p>
Energy Efficiency U-Value Rating	<p>Solid door in frame: 0.6 w/m2.k</p> <p>Glazed door in frame: 0.7 w/m2.k</p> <p>Acoustic performance: Weighted sound reduction of 31 decibels</p>
Triple Glazing	<p>All door glass triple glazed 50mm units.</p> <p>All sidelight glass triple glazed 36mm units.</p> <p>Decorative glass placed in middle pane to maintain aesthetic appearance, and to make cleaning of glass easier.</p> <p>Full range of backing glass available.</p>
Easily Maintained	<p>Your Rhino Door has been designed to be easily maintained.</p> <p>To keep your door clean, prolong the life of your surface finish, and protect your warranty, we recommend that you only use warm soapy water (washing up liquid is ideal) with a lint free cloth and wipe dry with a soft clean cloth. How often will depend on where you live. In a coastal or heavily industrialised area or near a main road, cleaning may need to be more often. PLEASE DO NOT...</p> <ul style="list-style-type: none"> • Use abrasive cleaners or scouring pads • Apply any type of bleach or solvent • Have any contact with any sharp objects • Use pressure washers or steam cleaners • Apply any adhesives of any type or tack

Designs on Satin

These glass styles have the decorative glass laid out on a satin centre pane with clear glass on both the inside pane (known as backing glass) and the outside pane, this is how they are presented in the brochure. You can of course change the centre pane to clear, and you can also change the backing glass to a form of privacy glass (see non-decorative glass below).

Achill

Bere

Rathlin

Scariff

Tuskar

Designs on clear centre

This range of glass styles has been produced using clear glass for the centre pane and are all shown with stippolyte backing glass. Again, you can change the backing glass to whatever non-decorative glass you prefer, or you may select clear as a backing glass if you wish.

Aran

Basket

Dual texture glass

This close up of our Aran style glass with a Stippolyte backing demonstrates clearly the dual textured effect available from both Aran and Basket glass styles.

For our dual texture glass, we firstly lay the design down on a satin centre pane. Then we select panels within the design and we make these clear. In the images shown we have then placed a stippolyte glass behind, this has the effect of creating a new and exciting dual textured appearance. You can of course place a backing glass of your own choice behind.

NON-DECORATIVE GLASS STYLES

For some homeowners, there is nothing more elegant than a well chosen non-decorative glass. We have presented here some of the more readily available options. It is always possible to choose clear glass either.

Flemish – Privacy Level 1

Minster – Privacy Level 2

Contora – Privacy Level 3

Stippolyte – Privacy Level 4

Cotswold – Privacy Level 5

We also offer full Satin glass, which is a totally private glass type, and Satin with a clear border, which is totally private, but with a clear border all round the edge of approximately 25mm. Satin Clear Border is demonstrated in the image adjacent.

COLOUR IN GLASS

It is possible to change the colours in the decorative glass if desired. Simply let us know your perfect colour, and we will make it happen.

GLASS SPECIFICATIONS

Rhino Doors glass units are always triple glazed as standard. We use a 50mm triple glazed unit in our door glass, and a 36mm triple glazed unit in our sidelight glass.

The decorative pane is sealed into the centre to make it easily maintained. We always use energy efficient warm edge spacer bars

Satin Clear Border glass is made with a 40mm border from glass edge, this is approximately a 25mm visible border when glazed. Colours in glass cannot be guaranteed to be exact match to colours on doors as they are two different processes. Decorative units are handcrafted and may contain very slight imperfections from time to time, this does not affect the performance of the glass. The glass illustrated throughout this brochure is in its standard format and is how it will be manufactured unless you specify otherwise. For full images of all our glass range, and to be able to enlarge the images, please visit our website www.rhino.ie

RHINO DOOR ACCESSORIES

Our handles, urn knockers and letterboxes are all made from stainless steel which has incredible anti corrosion properties. Stainless steel easily outperforms the alternatives made from zinc. Our Doctors Knockers and Door Knobs are made from solid brass.

HANDLES

Standard door handles are available in two different styles, and each style is available with two different functions.

Lever / lever handles have the same elegant handle inside and outside, lever / pad handles have a traditional pad external handle.

Inline handles will operate an unlocked door from outside. Offset handles will always require a key to open them from the outside.

Available handle colours are Chrome, Satin Silver, Gold, Brushed Steel, White and Black.

Satin Silver Lever / Pad

THRESHOLD OPTIONS

Thresholds are available in Standard (pvc), Slim (pvc), or Low Aluminium. The pvc thresholds will be coloured to match your door frame, whilst the Low Aluminium threshold is available in either Satin Silver or Gold.

Standard

Slim

Low Aluminium

HINGES

Our discrete hinges combine the best of great looks and strength.

Available in White, Chrome, Satin Silver, Gold, and Black as standard.

Also available in Anthracite Grey and Cream at extra charge.

All Rhino Doors come with a 45mm backset as standard, offering you a better looking and better performing handle.

On some very narrow doors we may need to fit a 35mm backset

35mm backset.
Note keys overlapping the frame - these can cause damage to your door

45mm backset.
Note that the same keys are now clear of the frame - less damage to door

SIDELIGHTS AND TOPLIGHTS

We have the capability to produce a wide range of frame variations to suit each individual home.

Please speak with your expert local installer, who will be best placed to advise which frame setup is most suited to your requirements.

Arches and angles are also available.

SIDELIGHT GLASS

Our entire glass range as per page 39 is available in sidelight or toplight glass. You will see a range of sidelights illustrated across the main part of our brochure from pages 5-36. The exact layout of your decorative glass will be customised to best suit the frame style you have selected for your sidelight or toplight.

RHINO
DOORS

RHINO SIDE PANELS

Rhino composite side panels are the perfect companion for your Rhino Door. Our solid core engineered side panels are made of the same composition as the door. It also has the same woodgrain finish and can be coloured to perfectly match your door colour.

The full range of Rhino Glass as per page 39 is available to be glazed into your Rhino side panel.

The composite side panel (44mm thick) is slightly thinner than the door leaf (70mm thick). This allows it to be glazed into the sidelight the same way that a unit of glass would be.

The glass units in the composite side panels are 24mm thick. All decorative glass styles will be triple glazed, non-decorative glass styles will be double glazed.

There are certain size restrictions on these panels, please speak to your local door installer.

DOOR CONSTRUCTION

- 70mm solid core engineered composite door slab exceeds PAS 24 specifications.
- High density CFC free polyurethane core.
- Rigid polymer frame in slab will not warp, split, crack or allow any water to penetrate.
- High impact resistant 2mm thick GRP skin.
- Structurally bonded polyurethane core for extra strength.
- Solid hardwood slab subframe.
- Polyurethane is the same material used to insulate the walls of your house
- Strong & Energy Efficient

STRENGTH & SECURITY

Rhino Doors are built tough. Solid core door slab, strong pvc frame, high security 10 point lock, strong hinges, triple glazed glass, stainless steel handles, heavy gauge reinforcing, impact resistant GRP.

We have engineered strength and security into every part of our door.

ENERGY EFFICIENCY

Traditional Door vs The Rhino Door

Photographs show the thermal efficiency of each of the doors we tested. The darker the blue, the less heat is being lost. Reds and greens – the predominant colours on the timber door – indicates high heat loss.

We all worry about how much energy our homes use. The rising cost of our energy bills and our impact on the environment mean we want to keep our consumption to a minimum. One of the best ways to do this is to choose thermally efficient products that keep warmth in and cold out, saving money and emissions.

Rhino Door Solid: 0.6 w/m².k (Gregory style)
Rhino Glazed Door: 0.7 w/m².k (Hennessy style)
